The figures shown in the half-year report have not been subjected to an external audit.

<sup>\*</sup> Including funds under management at affiliated parties not included in the consolidation. For the sake of uniformity, this statement presents balance sheet totals other than for Triodos Bank Private Banking, where the total assets under management are invested according to Triodos criteria.

<sup>\*\*</sup> Earnings per share are calculated over the average number of outstanding shares during the financial year.

<sup>\*\*\*</sup> Including all co-workers employed by Triodos Bank NV or group companies, not including co-workers employed by joint ventures.

## Report of the Board of Management

he financial crisis continued to expand and intensify during the first quarter of 2009. Its impact on the real economy has also become increasingly clear. In the United States, Europe and other parts of the world, many countries are in a deep and possibly protracted recession. It seems that the sentiment on the stock markets has been turning recent. Given the nature of the crisis, any signs of recovery have come much sooner than expected. For some commentators, the financial crisis appears to have bottomed out and recovery is already cautiously expected for 2010.

This upturn can be read in many economic and financial analyses, with the implication being that there will be a return to the old days. The striking results of the investment banks already provide proof of this, with record profits delivered in the second quarter of 2009. However, these profits have little to do with developments in the real economy. So it may be dangerous to think that the crisis is over. A thorough analysis of the causes of the crisis have not yet emerged, let alone any important lessons learned.

The discussion about the role of banking in society is only just beginning. Public authorities and supervisory bodies, as well as bankers, must start searching for their new role. But one thing is certain; the banking system rescue, which was unprecedented in its scale and impact, cannot be repeated. Instead, the role of banking itself must be reassessed. Banks need to be forced to take fewer risks and focus on their main role in society - the prudent management of savings and providing credit. This transformation will take years and stands in sharp contrast with the hope that everything will soon be back to 'business as usual'.

The financial crisis is not the only one we face. The climate crisis, the chasm between rich and poor and the exploitation of finite natural resources are less easy to solve than the restructuring of a financial system. Triodos Bank aims to emphasise the positive role that the banking community can play to resolve these issues, both through its own actions and by contributing to the public debate.

## THE GLOBAL ALLIANCE FOR BANKING ON

The Global Alliance for Banking on Values was established on 3 March 2009. The alliance of eleven leading sustainable banks was launched with inspiring addresses by HRH Princess Máxima of the Netherlands and Achim Steiner, Executive Director of UNEP (the United Nations Environmental Programme). Its aim is to demonstrate that value-driven banking can support millions of people in their pursuit of a sustainable existence and is simultaneously also stable and profitable - perhaps as a result of this - at a time when the banking system is facing a major crisis. Triodos Bank, together with Shore Bank (usa) and BRAC Bank (Bangladesh), are the Alliance's co-founders. The Global Alliance will devote itself to banking that creates value for the real economy on the basis of sustainable values.

## THE MOST SUSTAINABLE BANK IN THE WORLD

With considerable pride, Triodos Bank received the prestigious Financial Times Sustainable Bank of the Year Award on 4 June 2009. While this prize is usually awarded to a major bank that has promoted sustainability as part of its activities, the jury decided to honour Triodos Bank this year because of its pioneering work and its comprehensive sustainable operations. The FT Sustainable Banking Awards are conferred by an international jury, selected on the initiative of the Financial Times and IFC, a member of the World Bank Group.

#### GROWTH OF BANKING ACTIVITIES

During the first six months of 2009, Triodos Bank's balance sheet total rose by more than 13% to EUR 2.7 billion as at 30 June 2009. Growth during the same period last year was 8%. The Board of Management is very satisfied with this increase. The fact that so many people and companies have decided to switch to Triodos Bank in times of uncertainty indicates that the Bank has considerably strengthened its position in the market.

The credit portfolio grew by more than 12% during the first six months of 2009 with all of Triodos Bank's offices contributing to the growth. The credit portfolio continues to be of good quality. To be on the safe-side, a provision

Peruvian microfinance bank, Mibanco lends money to around 361,000 borrowers. José Antonio Ccencho Limache is one of them, and has been able to develop his company thanks to loans from the bank.

Triodos Fair Share Fund, Triodos-Doen and Hivos-Triodos Funds are shareholders in Mibanco.

has been formed for a number of items, which is in line with the long-term trend. Partly in view of the deteriorating economic climate, we consider this to be a positive development.

The amount of funds entrusted, mainly comprising of saving accounts and fixed term accounts, increased by almost 15% during the first six months of 2009. Growth far exceeded expectations, especially during the first three months of 2009.

## GROWTH OF INVESTMENT FUNDS IS SLOWLY PICKING UP AGAIN

The investment climate has improved somewhat during the last three months, and the Triodos investment funds have benefited from this. Growth in the first six months of 2009 amounted to almost 6% compared to a decrease of 2% in the same period of 2008. Funds under management totalled EUR 1.5 billion as at 30 June 2009.

The Triodos Microfinance Fund was launched on 2 March 2009 with an initial investment of EUR 23 million. This Fund is primarily aimed at the institutional market. The aim is for it to grow to EUR 200 million to make the most of the many opportunities offered by this market, in which the Bank has traditionally held a strong position.

On 9 March 2009, Triodos Green Fund received the FD Morningstar Award due to its excellent performance in 2008 and steady returns during the past few years.

#### FINANCIAL RESULTS

Triodos Bank's operating profit rose by more than 50% compared to the same period in 2008. Net earnings for the first half of 2009 totalled EUR 5.7 million compared to EUR 3.7 million for the first six months of 2008. While the organisation has increased its underlying profit through its core business, an exceptional item has also enhanced the overall profit.

#### PROSPECTS

Barring unforeseen circumstances, further growth is expected in the second half of 2009. There has been a significant increase in the opportunities for corporate lending and renewable energy projects.

In addition, Triodos Bank expects to open a branch office in Frankfurt, Germany at the end

of 2009. The necessary licences have now been obtained.

Triodos Bank intends to attract fresh capital at the end of September 2009 by issuing depository receipts for shares, the main reason being the strong growth of all activities. This issue will facilitate further growth of the credit portfolio in the coming two to three years.

The expectation is that the financial results will develop favourably.

Zeist, 26 August 2009

## Sustainable banking

Triodos Bank finances companies, institutions and projects that add cultural value and benefit people and the environment, with the support of depositors and investors who want to encourage socially responsible business and a sustainable society.

#### Our mission is

- To help create a society that promotes people's quality of life and that has human dignity at its core.
- To enable individuals, institutions and businesses to use money more consciously in ways that benefit people and the environment, and promote sustainable development.
- To offer customers sustainable financial products and high quality service.

#### OUR AMBITION

Triodos Bank wants to promote human dignity, environmental conservation and a focus on people's quality of life in general. Key to this is a genuinely responsible approach to business, transparency and using money more consciously. Triodos Bank puts sustainable banking into practice. First and foremost, this means that we offer products and services that directly promote sustainability. Money plays a leading role in this because using money consciously means investing in a sustainable economy. This in turn helps to create a society that enjoys a better quality of life.

#### OUR MARKET AND CORE ACTIVITIES

Triodos Bank wants to achieve its mission as a sustainable bank in three ways.

#### As a sustainable service provider

Bank customers not only want sustainable products and services, but also competitive prices and a professional service. Triodos Bank believes that these key customer values cannot be seen in isolation. So the Bank tries to offer a collective package of banking services to promote sustainable development. The Bank's aim is to create a broad customer base – a combination of private and corporate customers who have made a conscious decision to bank with Triodos. Exactly how this happens differs in each country; our services have developed in different ways in each of the countries where we work.

#### As a product innovator

A second strategic objective is to develop innovative products and sell them through the Bank and third parties. These products directly reflect the mission and values at the core of the Bank's work. In The Netherlands, products have been developed furthest. The Triodos Added Value Funds, Triodos Green Fund, Triodos Sustainable Real Estate Fund and the Triodos Culture Fund are all distributed to the general public via other banks. The launch of Luxemburg-based funds has also laid the foundation for European-wide distribution. More than 50% of the growth in these funds now comes from distribution via third parties, bringing Triodos Bank products to a broader audience.

#### As an opinion leader

Triodos Bank wants to stimulate public debate about issues, including quality of life, corporate social responsibility and sustainable banking. It also wants to use more than 25 years' experience to encourage society to promote more sustainable development. The implications of this public debate extend well beyond the activities of the Bank itself. And its vision and approach has made it an internationally-recognised name.

The photos in this half-yearly report are all of clients of Triodos Bank.

This half-yearly report is printed on FSC-certified paper.
