¹ The Key metrics information of Triodos Bank is disclosed every six months.

² The increase of the exposure and the decrease of the leverage ratio are mainly due to the termination of the temporary application of the CRR exemption as per April 1, 2022 where certain Central Bank exposures were previously excluded from the leverage ratio. The CRR exemption was introduced by the ECB in response to the COVID-19 pandemic. The termination of the temporary CRR exemption also decreased the minimum leverage ratio requirement.
Sustainable banking means using money with conscious thought about its environmental, cultural and social impact, with the support of savers and investors who want to make a difference. It means meeting present day needs without compromising those of future generations.
